WhatNext Vision Motors: Shaping the Future of Mobility with Innovation and Excellence

USER STORY:

As a mobility solutions manager, I want to manage vehicle bookings, customer details, service schedules, and payments efficiently using a CRM application.
The system should automate booking confirmations, service scheduling, notifications, and reporting for better management and customer satisfaction.

---

1. INTRODUCTION

1.1 Project Overview

The *WhatNext Vision Motors CRM* is an application designed to manage vehicle bookings, customer data, service schedules, and payments.
The system automates workflows, improves operational efficiency, and enhances customer experience in the mobility sector.

1.2 Purpose

• Automate vehicle booking process
• Manage customer details efficiently
• Track service and delivery schedules
• Generate reports and dashboards
• Send automated notifications

---

2. IDEATION PHASE

2.1 Problem Statement

Manual vehicle booking and service systems lead to errors, scheduling conflicts, poor customer communication, and inefficient management.
This CRM system solves these issues by automating booking, scheduling, and communication.

2.2 Target Users

• Mobility Manager
• Service Coordinators

• Admin Users
• Customers

---

3. REQUIREMENT ANALYSIS

3.1 Functional Requirements

• Vehicle Booking Management
• Service Scheduling
• Customer Management
• Payment Tracking
• Email/SMS Notifications
• Report Generation
• Dashboard Analytics

3.2 Non-Functional Requirements

• Security
• Scalability
• Performance
• Reliability
• Availability

---

4. PROJECT DESIGN

4.1 Custom Objects

• Vehicle Booking
• Service Details
• Customer
• Payment
• Vehicle Availability

4.2 Automation

• Flow Automation (Booking confirmation, service reminders)
• Apex Classes
• Triggers

---

5. PROJECT DEVELOPMENT

Milestones:

1. CRM Setup
2. Object Creation
3. Field Creation
4. Relationships Setup
5. Flow Creation
6. Apex Classes Development
7. Trigger Implementation
8. Reports Creation
9. Dashboard Setup

---

6. APEX CLASSES

• BookingConfirmationSender
• BookingStatusUpdater
• PaymentUpdater
• ServiceReminderSender
• VehicleAvailabilityHelper

---

7. TRIGGERS

• VehicleBookingTrigger

---

8. REPORTS & DASHBOARDS

• Booking Report
• Service Schedule Report
• Payment Report
• Customer Report

---

9. TESTING

• Apex Test Classes Created
• Code Coverage Achieved
• Functional Testing Done

---

10. CONCLUSION

The *WhatNext Vision Motors CRM* application improves vehicle booking and service management, avoids scheduling conflicts, and enhances customer communication.
It ensures smooth operations and better decision-making through automation and analytics.

---

11. FUTURE SCOPE

• Mobile App Integration
• Online Payment Gateway Integration
• AI-based Vehicle Recommendations
• SMS/WhatsApp Notifications
• Multi-Branch Management System

---
